It is our vision to ensure our college is a place of belonging where all students feel safe, valued and respected. We are committed to empowering students to become knowledgeable, resilient, and curious learners who are prepared to engage with the local and global community

One size does not fit all, and neither should education. Every student is unique with individual strengths, passions, interests and learning needs. Our dedicated staff are committed to student-centred learning, ensuring every student is well known and empowered to personalise their learning journey through greater choice of subjects, voice in decision making and agency within learning.

SUPPORTIVE TRANSITIONS

For our Transition to Foundation program, students experience 5 formal transition sessions in term 4, participating in structured play and learning experiences with other students who will be a part of the year level cohort. This allows our teachers to see our mix of students, their friendships, strengths and personalities to assist with forming classes for the following year. We also consult with the Kinder educators to understand our newest additions to the Junior School in a holistic way.
